⭐ **Drowning in a sea of resumes and still not finding the right candidate?**
My 2-minute video cuts through the noise and giving you a clear view of my technical skills and what I uniquely offer to your team

EXPERIENCE (1y+)

Dataphi, Bangalore Full Stack Developer ⭐ (JAN, 2023 - SEP, 2023)

- Engaged in multiple React projects, **leading frontend development of a gig platform and playing a key role in other projects such as -** a document management site, a school internship platform, and a admin dashboard site.
- Frontend Responsibilities included translating Figma designs into React, utilizing Formik & Yup for validation, Zustand for state management, and GraphQL with Apollo for API bindings.
- In backend development, I focused on **creating GraphQL APIs using Django and Node.js** & resolving bugs. Also provided assistance in integrating AWS S3 into Django, as well as developing a React-Firebase notification system.
- Actively communicated with the QA team for bug detection and resolution, ensured timely updates of completed tasks on spreadsheets, and focused on crafting maintainable code.

EQ Capital, Delhi Full Stack Developer (JUL, 2022 - DEC, 2022)

- Participated in a team to create a dynamic community platform for programmers, contributing to the translation of Figma designs into React interfaces and implementing JWT authentication.
- Involved in the **development of RESTful APIs using Django**, ensuring efficient integration with React components for improved functionality and user experience."

PROJECTS

VibeVault & VibeMatch: ⭐

- **A personal creation:** It's a twoInOne app. This MERN stack application allows users to rate and follow a wide range of media, and maintain a list, **similar to AniListor IMDb, but for everything** including books, anime, shows, and movies.
- It also features VibeMatch, which uses a **FastAPI backend to match users** based on their media preferences — it's like **Tinder, but the matchmaking is based on your media list**

MERN Chat App

- Realtime chat app with React, Node.js ,socket.io , websocket, Mongodb and Express

Django-React E-commerce Platform

- Built an ecommerce platform using Django, React with, JWT authentication, Redux, and admin capabilities

AI Posture Detection for Yoga (R&D project)

- Yoga posture detection using Python, OpenCV, Scikit-learn, Mediapipe, Streamlit, Pandas, SQLite, and WebRTC.
- **Approved research paper for publication.**

Other projects

- Next.js portfolio website ,Flutter crud notes app, Data analytics assignments, python script to change folder names

SKILLS

- Python, Sql, Javascript, Django, Express.js, Node.js, React, Git, Docker, GraphQl, REST API,FastApi

ABOUT ME

I'm a curious individual with a knack for problem-solving. Having spent a year as a full-stack developer, I am now focused on pursuing a career in back-end development and AI. In addition to my technical skills, I have honed my leadership and teamwork abilities through managing business operations alongside my father. With technical expertise and leadership skills, I've also extensively studied psychology. This substantial understanding of human behavior enhances my ability to work effectively in diverse teams.

EDUCATION ➡ NIIT University - M.sc Computer Science |AI specialization cloud and blockchain elective (2019-2023)
